

Become our new Lead Automation Engineer

Combine professional expertise with holistic innovation in exciting process plant projects

AABO-IDEAL Group designs and manufactures industrial solutions for surface treatment (process plants) and components with energy-efficient and environmentally friendly solutions in mind. Our product development includes both opportunities for energy optimization and CO2 savings.

Are you looking for new challenges in a dynamic work environment? We are looking for an experienced Automation Engineer with a holistic approach to work and an exceptional ability to handle process plants. You will thrive in the role if you are methodical, meticulous, and can work both independently and as part of a team. Prioritization and deadlines are a natural part of your working day, and you are known for your professional expertise and ability to drive projects forward.

Our Automation team is part of the Engineering Department, which sits together with the Project Department. In everyday life, we refer to ourselves collectively as the Technical Department. In the Automation team, colleagues are spread across Europe. Currently, we are based in Denmark (1), Czech Republic (1) and Croatia (2). A total of 22 employees are assigned to the Technical Department, the majority of which are located in Vester Aaby on Funen and a smaller part in Motala in Sweden. Your direct manager is located at the office in Motala.

Your role with us

We are looking for a Lead Automation Engineer and part of your work will be to coordinate the team's tasks and be the go-to person for both the team and your colleagues in general.

As a key part of the Automation team, your key tasks will be:

Primarily

- Programming and commissioning of customer projects
- Assign automation resources to customer projects
- Drive internal projects in the field of automation
- Support your organization in automation

Secondary

- Be the driving force in the development and documentation of the company's automation solutions together with both internal and external resources
- Support and develop simple processes for the area
- If necessary, help others with various tasks
- Ensure compliance with various laws and regulations

Your profile

Do you have an education in automation at minimum bachelor level or other relevant technical education such as mechanical engineering, electronics engineering, Bachelor of Engineering in robotics, or electrical engineering? Then we would like to invite you to put your knowledge into play and drive the development of our automation solutions in our dynamic team.

Combine your professional skills with a holistic approach to technology and innovation and take the next step in your career with us.

- Experience with industrial automation and associated standards
- Good knowledge of Siemens TIA Portal - Programming in TIA Portal, Siemens S7-1500 (LAD/SCL) and HMI
- Frequency converters (commissioning)
- Must be able to read electrical drawings
- EL-CAD-software (tex Eplan, EL-pro CAD, PC skemaer)
- Good skills in Microsoft Office
